

## **Darren Chester**

Minister for Infrastructure and Transport

## **David Littleproud**

Federal Member for Maranoa

September 19, 2017

### **New bridge to be built in Wyandra thanks to \$390,000 Federal Govt investment**

THE one-lane Deep Creek Bridge, at Wyandra, will be replaced thanks to \$390,000 in Federal Government funds, Maranoa MP David Littleproud announced today.

“This bridge at Wyandra, in the Paroo Shire, will be replaced under Round Three of the Bridges Renewal Program and means this timber bridge will be replaced with a two-lane crossing, increasing the load limit from 25T to 50T,” Mr Littleproud said.

“This upgrade will extend this bridge’s life by 100 years and will improve access and safety, not only for the community but also this improved route will remove an existing 128km detour for heavy vehicles.

“The Coalition Government is committed to supporting local communities to deliver the infrastructure they need and, one of the best things about this program, was that local councils and communities were invited to submit projects according to local priorities.

“As a result, more than \$2.6 million will be invested by the Federal Government into bridge upgrades to improve safety and our transport network across my Maranoa electorate.”

Minister for Infrastructure and Transport Darren Chester said the \$162.53 million funding toward round three of the Bridges Renewal Program was in addition to the \$216 million committed under the first two rounds.

“The renewal and upgrade of 186 bridges under this round will deliver social and economic benefits throughout regional Australia,” Mr Chester said.

The Federal Government’s financial commitment in this round will be matched by successful proponents. To allow for a wider distribution of projects, the Australian Government’s contribution under round three has been limited to \$5 million per project.
