Federal Government funds to move Aramac black spots to oblivion with \$70,000

Motorists living in the Aramac area will drive with more confidence as road blackspots will be targeted with \$70,000 in Federal Government funds, Maranoa MP David Littleproud announced today.

“Eastmere Road, east of Lake Mueller, is going to have new signage, funded with \$42,500, which will help to prepare motorists for the winding roads, tight turns and flood-ways in that area,” Mr Littleproud said.

“Too many loved ones are injured or lost on our roads and we need to do everything possible to make accidents and fatalities stop.

“Roads all across the Maranoa area are teeming with heavy trucks, caravans and commuters and to make sure everyone returns home safely, we need to get rid of black spots.

“A portion of the Jericho-Aramac Road between Winhaven and Gracevale Roads will use \$27,500 to better prepare motorists for winding roads and tight turns.

“Those funds will also be used to remove vegetation on the road.”

The latest round of funds for the Black Spot Program in the Maranoa electorate come to more than \$410,000 with two other sites to receive funding as well.
